## SUBJECT INDEX

- $\alpha$  solanine, melting point of, 403  
Analysis for marketable yield, specific gravity and dry matter, 138  
Aphid, green peach, prevention of leaf roll spread by, 23  
Aphid populations on varieties of Irish potatoes, 63  
Argentine potato gene bank, 474  
Baked potato quality influenced by baking and holding methods, 271  
Bisolvent extraction method for determination of glycoalkaloids, 302  
Blight, early, screening for, 1  
Book announcements:  
    American Potato Yearbook, 374  
    CBE style manual, 3rd edition, 374  
    Circadian rhythmicity, 208  
    Economics of food processing, 207  
    Fungicide and nematocide tests, results of 1971, 121  
    Information materials catalog for the food and cosmetic industries, 475  
    Viruses of potatoes and seed potato production, 208  
Book reviews:  
    Encyclopedia of food engineering, 73  
    Fertilizer technology and use, second edition, 327  
    Micronutrients in Agriculture, 489  
Browning, Edward, achievement award announced, 164  
California, control of tuberworm and green peach aphid in, 291  
Calculator, specific gravity, 349  
Campbell, John C. honored, 351  
Canada, production of certified seed in, 202  
Carbon monoxide from engines in warehouse operations, 93  
Catalytic mufflers reduce carbon monoxide, 93  
Certified seed production by varieties, 202  
Certified seed potatoes, *V. albo-atrum* carried on, 397  
Chemical evaluation of sunflower oil for frying potato chips, 444  
Chemical seed and soil treatments for *Verticillium* control, 79  
Chip color, effect of fertilizer and storage on, 43  
Chip frying, sunflower oil for, 444  
Chlorpropham (CIPC), effects of, on sprouting and plant emergence, 420  
Clark, Frank L., obituary, 207  
Colorado potato beetle control by seed piece treatment, 321  
Components of yield, selection of parents on basis of, 182  
Contamination of seed potatoes with fusarial propagules, 391  
Consumer to know if potato chips are "real" or from dehydrated spuds, 324  
Control of *Verticillium albo-atrum* on seed potatoes, 397  
Cork diseased Peruvian potatoes, mop-top virus in, 234  
Culture, water and pot, for growing potatoes, 35  
Dehydrated potatoes for making potato chips, 324  
Determination of sulfur dioxide in sulfited potato flakes, 470  
Dry matter, analysis for, in eight varieties, 138  
Dry matter production and nutrition of *S. andigena* in Peru, 151  
Dye binding, use of, in estimation of potato protein, 177  
Early blight, screening for resistance to, 1  
Engines, carbon monoxide from, 93  
Estimation of potato protein content by dye binding, 177  
Evaluation, chemical, of sunflower oil for frying potato chips, 444  
Fertilization, effect of, on chip color, 43  
Fertilizer, effect of, on leafroll-net necrosis in Russet Burbank, 261  
Fertilizer uptake and removal by *S. andigena* in Peruvian Andes, 151  
Field resistance to early blight, screening for, 1  
Flakes, potato, protein in, 255  
Flakes, sulfited potato, sulfur dioxide in, 470  
Flavor of sunflower oil, for frying potato chips, 444  
Foliar resistance to oviposition of leafhopper in tetraploids, 98  
Freeze-leached potato strips, variables affecting sugar removal from, 456

- Fumigants, effect of, on leafroll-net necrosis in Russet Burbank, 261  
Fungicides, effect of, on leafroll-net necrosis in Russet Burbank, 261  
Fusarial propagules on seed potatoes and their removal by washing, 391  
Gene, bank in Argentina, 474  
Genetic variation in tetraploids and foliar oviposition of leafhopper, 98  
Genotypic stability analysis for yield, specific gravity and dry matter of eight potato varieties, 138  
Glycoalkaloid, inheritance in potato, 209  
Glycoalkaloid content, effect of variety and location on, 334  
Glycoalkaloids, determination of, in potatoes with a bisolvent extraction method, 302  
Glycoalkaloid, melting point of  $\alpha$ -solanine used to analyze for, 403  
Golden nematode found in Mexico, 281  
Green peach aphid, prevention of leaf roll spread by, 23  
Growing potatoes by water culture and pot culture techniques, 35  
Growth and development of potato as influenced by mist irrigation, 187  
Hawkins, Arthur, honored, 280  
Hosts of potato spindle tuber virus in Solanaceae, 70  
Host plants, symptomless *Lycopersicon*, for virus S, 339  
Hydrogenated sunflower oil for frying potato chips, 444  
Inheritance of potato glycoalkaloids, 209  
    of Katahdin "knobby tuber," 285  
Insecticides for control of tuberworm and green peach aphid, 291  
    for control of tuberworm in late-crop potato foliage, 383  
Insecticides, systemic, effect of, on yield of Norland, 438  
International potato center established, 415  
International potato center symposium, 120  
Irish potato utilization of 1970 crop, 40  
Irish potatoes, aphid populations on varieties of, 63  
Irrigation, mist, influence of, on potato:  
    I. micro-environment, 123  
    II. growth and development, 187  
    III. nutrient content of leaves, 218  
    IV. tuber quality factors, 243  
Kjeldahl nitrogen determination for measuring potato protein, 177  
"Knobby tuber," inheritance of, in the Katahdin, 285  
Kraus, James E., honored, 352  
LP gas engines, and carbon monoxide emission, 93  
Leafroll, associated with tuber net necrosis, 330  
Leafroll-net necrosis, effect of fertilizer, fumigants and fungicides on, 261  
Leafroll spread, prevention of, by spraying, 23  
Leaf water relations affected by mist-irrigation, 123  
*Lycopersicon* host plants for potato virus S, 339  
Meadow vole for evaluation of protein in potato flakes, 255  
Melting point of  $\alpha$ -solanine determined, 402  
Mexico, golden nematode found in, 281  
Micro-environment, as related to influence of mist irrigation on potato, 123  
*Microtus pennsylvanicus*, evaluation of protein in potato flakes by, 255  
Multiplication and rate of reinfection of virus-free potatoes in PEI, 432  
N<sup>6</sup>-benzyladenine effect of, on vegetative and tuber growth, 109  
Necrosis, leafroll-net: effect of fertilizer, fumigants and fungicides on, 261  
Net necrosis of tubers associated with infection of leafroll, 330  
Nutrient content of leaves as influenced by mist irrigation, 218  
Obituary, Frank L. Clark, 207  
    Frederick James Stevenson, 240  
Ontario, seed-piece treatment in, 7  
Peach aphid, green, spraying to prevent leafroll spread by, 23  
Peru, identification of *Phytophthora erythroseptica* in, 309  
Peruvian Andes, dry matter production of *S. andigena* in, 151  
Peruvian potatoes, potato mop-top virus in, 234  
Phureja-haploid tuberosum families, protein comparisons in, 227  
*Phytophthora erythroseptica* in Peru, identification and pathogenesis, 309  
Plant emergence, effect of CIPC on, 420

- Pot culture, growing potatoes by, combined with water culture, 35
- Potato aphids, on various varieties, 63
- Potato Association of America, The
- abstracts of papers presented at 50th annual meetnig, 356
  - annual meeting, call for papers for, 42, 77
  - annual meeting highlights, 327
  - annual meeting program, 167
  - annual meeting minutes, 407, 410
  - committee members for 1972-73, 451
  - honorary life members
    - Kraus, James, 352
    - Simplot, John R., 354
  - honored, Campbell, John C., 351
  - information for authors, 74, 283, 325, 479
  - request for nominations for honorary life membership, 475
- Potato center, international, established, 415
- Potato chip color, effect of fertilizer, storage and reconditioning on, 43
- Potato chips from fresh or dehydrated potatoes, 324
- Potato eyes, effect of CIPC on sprouting of, 420
- Potato flakes, protein in, evaluated by the meadow vole, 255
- Potato flakes, sulfited, sulfur dioxide in, 470
- Potato growing by water and pot culture techniques, 35
- Potato leafhopper, resistance to oviposition of, in tetraploids, 98
- Potato mop-top virus in cork-diseased Peruvian potatoes, 234
- Potato research and promotion plan rules issued by USDA, 328
- Potato screening for resistance to early blight, 1
- Potato seed-piece treatment, in Ontario, 7
- for control of Colorado potato beetle, 321
- Potato spindle tuber virus hosts in suborder Solanineae, 70
- Potato spraying to prevent leaf roll spread by aphid, 23
- Potato starch production with low waste, 12
- Potato strips, sugar removal in freeze-leached, 456
- Potato tuber worm, control of, in California, 291
- Potato tuber worm control in late-crop potato foliage, 383
- Potato tubers, net necrosis in, associated with leafroll infection, 330
- Potato viruses M, S, X and spindle tuber, resistance to, 342
- Prince Edward Island, multiplication and reinfection of virus-free potatoes in, 342
- Production of certified seed potatoes by varieties, 202
- Production of potato starch with low waste, 12
- Protein comparisons in Phureja-haploid tuberosum families, 227
- Protein content estimated by dye binding and Kjeldahl nitrogen determination, 177
- Protein in potato flakes evaluated by the meadow vole, 255
- Quality, tuber, influenced by mist irrigation, 243
- of baked potatoes as influenced by baking and holding methods, 271
- Reinfection rate of, in virus-free potatoes, 432
- Resistance to early blight, screening for, 1
- to ovipostiion of leafhopper in tetraploid potatoes, 98
  - to virus S in the potato, 196
  - to viruses M, S, X and spindle tuber in *Solanum* species, 342
- Rhizoctonia solani*, effect of tuber-borne sclerotia of, on the potato, 296
- S, virus, host plants for, 339
- resistance to, in tuber-bearing *Solanum*, 342
- Scab resistance of haploids from *S. tuberosum* cultivars, 117
- Sclerotia, tuber-borne, of *Rhizoctonia solani*, effect of, on potato, 296
- Screening for resistance to early blight, 1
- Seed and soil treatments, influence of, on *Verticillium*, 79
- Seed-piece treatment by warming and chemicals in Ontario, 7
- Seed potato contamination with fusarial propagules, 391
- Seed potato production by varieties in U.S. and Canada, 202
- Seed potatoes, *V. albo-atrum* carried on, 397
- Seed size, spacing, stem numbers vs. yield, 463
- Selection of parents on basis of components of yield, 182

- Simplot, John R., honored, 354  
 Smith, Ora, honored, 413  
 Soil applied systemic insecticides, effect of, on yield, 438  
 Solanineae suborder, spindle tuber virus hosts in, 70  
*Solanum andigena* (cv. Renacimiento) dry matter of, in Peru, 151  
*Solanum species*, resistance to viruses in, 342  
*Solanum tuberosum* haploids studied for scab resistance, 117  
 Specific gravity, analysis for, in eight varieties, 138  
 Specific gravity calculator, 349  
 Specific gravity, effect of fertilization on, 43  
 Spindle tuber virus hosts in suborder Solanineae, 70  
 Spindle tuber virus, resistance to, in *Solanum* species, 342  
 Spraying potatoes to prevent leaf roll spread by green peach aphid, 23  
 Sprouting, effect of CIPC on, of potato eyes and plant emergence, 420  
 Starch, potato, production, 12  
 Sugar-end in Russet Burbank potatoes, 376  
 Sugar removal, variables affecting, in freeze-leached potato strips, 456  
 Sunflower oil, partially hydrogenated, for frying chips, 444  
 Sulfur dioxide in sulfited potato flakes determined, 470  
 Symptomless *Lycopersicon* host plants for virus S, 339  
 Systemic insecticides, effect of, on yield of Norland, 438  
 Tetraploid potatoes, resistance to leafhopper in, 98  
 Tuber-bearing *Solanum* species, resistance to viruses in, 342  
 Tuber-borne sclerotia of *Rhizoctonia solani* on potato, 296  
 Tuber defects, *Verticillium* induced, influenced by seed and soil treatments, 79  
 Tuber quality as influenced by mist irrigation, 243  
 Tuberworm, insecticide control of, in California, 291  
 Tuberworm, insecticide control of, in late-crop potato foliage, 383  
 U. S. production of certified seed in, 202  
 USDA issues rules for potato research and promotion plan, 328  
 Utilization of 1970 crop Irish potatoes, 40  
 Utilization of 1971 crop Irish potatoes, 476  
 Varieties:  
     Avon, haploids of, studied for scab resistance, 117  
     B51416, glycoalkaloid content of, 334  
     Cascade, chip color in, as affected by fertilization, 43  
     Chippewa, leaf roll spread in, affected by sprays, 23  
     Eslamboli, effect of N<sup>6</sup>benzyladenine on, 109  
     Green Mountain, leafroll spread in, affected by sprays, 23  
     Hindenberg, haploids of, studied for scab resistance, 117  
     Irish Cobbler, glycoalkaloid content of, 334  
     Katahdin, glycoalkaloid content of, 334  
         "knobby tuber" inheritance in, 285  
         verticillium wilt control in, 79  
     Kennebec, chip color in, as affected by fertilization, 43  
         glycoalkaloid content of, 334  
         leaf roll spread in, affected by sprays, 23  
         seed warming and seed treatment, effect on yield of, 7  
         verticillium wilt control in, 79  
     Norgold Russet, chip color in, as affected by fertilization, 43  
     Norland, yield affected by systemic insecticides, 438  
     Red Pontiac, glycoalkaloid content of, 334  
     Russet Burbank, chip color in, as affected by fertilization, 43  
         glycoalkaloid content of, 334  
         leafroll-net necrosis in, 261  
         sugar-end in, 376  
         yield of, 463  
     Sehago, warming and seed treatment effect on yield of, 7  
     White Rose, chip color in, as affected by fertilization, 43  
 Varieties of certified seed produced in U. S. and Canada, 202  
 Various varieties, aphid populations on, 63  
 Verticillium induced yield reduction vs. seed and soil treatments, 79

- Verticillium albo-atrum* carried by seed potatoes into Washington and control by chemicals, 397
- Virus, leafroll, associated with tuber net necrosis, 330
- leafroll-net necrosis as affected by fertilizer, fumigants and fungicides, 261
- leafroll, spread caused by aphids, prevention of, by spraying, 23
- M, resistance to, in *Solanum* species, 342
- potato mop-top, in Peruvian potatoes, 234
- S, resistance to, in potato, 196
- S, resistance to, in *Solanum* species, 342
- S, symptomless *Lycopersicon* host for, 339
- spindle tuber, 70, 342
- X, resistance to, in *Solanum* species, 342
- Virus-free potatoes, multiplication and reinfection of, in PEI, 432
- Warehouse operations, carbon monoxide in, 93
- Washing seed potatoes to remove fusarial propagules, 391
- Washington, *V. albo-atrum* carried on seed into, 397
- Waste, low, in starch production, 12
- Water culture combined with pot culture for growing potatoes, 35
- Yield components based on selection of parents, 182
- Yield, marketable, analysis for, in eight varieties, 138
- Yield of Norland, effect of systemic insecticides on, 438
- Yield reduction induced by *V. verticillium*, 79
- Yield related to N<sup>6</sup>benzyladenine treatment, 109
- Yield related to seed size spacing, stem numbers, 463

**Errata, Volume 49**

- Page 391, lines 14-15, read: "inoculum was greatly reduced when tubers were washed with brushing before cutting."
